

SOLUTIONS BUILT TO SIMPLIFY, SECURE, AND ACCELERATE COLLABORATION IN OFFICE 365 AND MICROSOFT TEAMS

Titan Workspace is a suite of document management and productivity solutions designed to simplify how people connect and work in Microsoft 365. Make it easy for employees & guest users to collaborate on documents and projects, securely share and sign documents, build intranets to support office and remote workers, and more—all within your familiar Microsoft applications such as SharePoint & Teams. You can finally eliminate the costs and risks of disconnected document solutions and bring full control of your digital assets in-house. Watch ROI and productivity soar with tools built to power your business and bring your people together, seamlessly.

WHY TITAN WORKSPACE ?

- Leverage your investment and familiarity with the Microsoft stack
- Strengthen document security in Titan Workspace
- Eliminate the need for additional document management, e-signature, and collaboration software
- Titan Workspace works seamlessly with Microsoft 365 applications including Teams and SharePoint
- Employees continue using their familiar Microsoft applications while taking advantage of additional Titan features and tools
- Organizations see rapid time-to-value because users do not have to learn new software or experience any disruptions
- Cost efficient for organizations to buy, deploy, and operate

Solutions

Increase productivity with a unified suite of tools built to standardize and facilitate document management, collaboration, and project tasks within Microsoft 365 applications

Document Management System

Eliminate the concerns of document compliance with built-in version control and secure sharing with external parties

- Take advantage of SharePoint without all the complexities and clutter
- Easily set up document permissions, security controls, and restrictions
- Trade manual, paper-based processes for digital document management and easy e-signatures
- Effectively enforce compliance through document tracking and version control
- Securely share any document with external parties removing the barriers of productivity
- Eliminate the costs and risks of external, third-party document and e-signing tools

Guest User Portal

Empower your people to easily collaborate with vendors and third parties in a secure, streamlined way through Titan's Guest User Portal.

- Collaborate anytime, anywhere with both internal and external users
- Create a centralized portal for guest users where customers, vendors, partners, and other external stakeholders can easily join as members of your team
- Securely track progress, changes, and communications with external parties
- Simplify vendor management with full visibility into their activity through a status dashboard

Intranet

Build a secure intranet to give office and remote employees a digital workplace to collaborate that's easily accessible from any device or location.

- Quickly get your own intranet up and running to provide employees with a seamless user experience
- Remove the barriers of productivity and empower your entire workforce to work anytime, from anywhere in the world
- Create the modern, mobile, and digital experience employee's demand
- Centralize operations in a secure and scalable environment

Project and Tasks Management

Easily manage the entire lifecycle of your projects and tasks with Titan's powerful, yet simple, Project and Tasks Management.

- Keep projects on track and profitable with full visibility into every document, task, and change using Titan's Project and Tasks Management.
- Save time and costs by consolidating and centralizing project management in one tool.
- A timesheet can be used to easily track, manage, and report on employee time. Titan workspace makes it easy with its timesheet solution to keep tabs on the hours worked and logged by each employee.
